

# We've got the **touch**

see more with  
your smartphone

Store, manage and control keys, cards and small assets more securely and efficiently with KeyWatcher Touch. Access is limited to authorized users, and all transactions are recorded with detailed reports available. The system will even automatically email transactional information to any user – at any time. And KeyWatcher's convenient touchscreen makes removing and returning keys easier than ever. With our modular design and full scalability, it's easy to see how we keep making key management better. That's Morse Watchmans' outside the box thinking – right inside the box.

*think inside the box.*
