

KeyWatcher® Touch

taking today's
keys into
tomorrow

Solve the frustration of looking for lost keys. Secure, manage and track them with the KeyWatcher Touch. Modular and expandable design allows configuring exact components needed such as key, card modules or storage lockers for personal assets. Program and track users and keys with TrueTouch Software. Instant key removals and returns with unlimited notifications. Integrate KeyWatcher Touch with many brands of access control systems.

Ideal for auto dealerships, aviation, banking, broadcast, cannabis, construction, corrections, data centers, education, fleet, gaming, government, healthcare, hospitality, law enforcement, logistics, military, municipalities, property management, public venues, retail, sports facilities, and more.

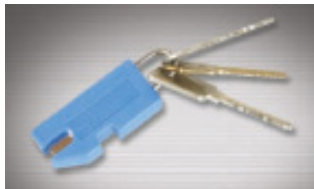

KeyWatcher® Touch

the integrated solution with touchscreen simplicity

Features:

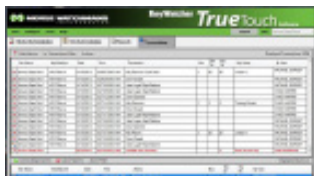

- Bright 7" full-color touch screen
- Create alerts and receive instant email or text notifications
- Add/delete/identify keys from a PC with the SmartKey Reader
- Shared programming capability for all KeyWatcher systems located in a site
- Enter custom notes with the on-screen keyboard
- Integrate fully with many leading access control systems
- Return keys to any system with the KeyAnywhere feature
- My Keys Out feature shows out and overdue keys
- Easy key removal - users select from a list of assigned keys
- Scheduled Reports feature lets users create reports, run them automatically and email, save, or print
- Modular customizable, scalable and expandable design lets users protect keys and assets such as cell phones and laptops
- All steel or transparent polycarbonate cabinet doors available
- Profiles feature quickly assigns users and permissions
- Auto-sync updates data as changes are made
- Supports thousands of keys and users per site

KeyWatcher Touch Accessories
