Securely stores up to 1,800 keys

Integrated internal card reader interface

Battery backup for uninterrupted operation

An Ideal Solution

Comprehensive car key management

Ideal for both new and used car dealerships

Perfect for service departments and rental car fleets

MORSE WATCHMANS

Auto KeyBank® Touch
the key tracking system for auto dealerships

KeyBank Auto helps you to:

- Ensure every sale is expedited by always having keys on hand
- Reduce expenses related to key and remote replacements
- Eliminate clutter and the inconvenience of pegboards and lock boxes
- Lower theft risk significantly and potentially decrease insurance premiums
- Minimize or eliminate unexplained mileage and vehicle damage
- Monitor the status and location of the vehicle inventory in real-time, anytime
- Review vehicle demo histories to identify slow-moving inventory
- Evaluate sales team performance based on demo activities

Practical Management Reports

Vehicle History Report

- Track how many times each car is demonstrated
- Take the "mystery" out of the mileage - know who's driven the vehicle while you were gone
- If a car is damaged or returned dirty, you can see who drove it last

Vehicle Inventory Report

- Determine vehicle status
- Establish real-time location of vehicles
- Analyze fast/slow movers
- Evaluate sales force demo performance

Employee History Report

- Analyze the number of demos
- Know how many vehicles each employee has out on loan

Key Control Data from SmartKeys

Keys are secured with a SmartKey that includes an identification microchip and a locking ring for enhanced security and functionality. Only users with the appropriate user code, as assigned by their security managers, can access these microchip-tagged keys from the cabinets.
